Hi Mark. As discussed with you earlier today, I do not have an issue with the location of the driveway. However, the entrance culvert will need to be replaced. P.W. so happens to be ditching along in front of this property in the Fall of 2024. I have discussed with the owner, and he will have a culvert there for us to install as we ditch through. The owner is also under the understanding that he will receive a bill for the machine work and gravel used to complete the job.

Regards,
