

GRAND VALLEY

Town of Grand Valley Operating Budget 2025

Landfill Monitoring

The Town closed its landfill site over a decade ago and continues to monitor the former dump for its effects on the surrounding environment.

The monitoring program is provided by RJ Burnside each year, and costs are funded by the levy.

The request to reduce monitoring requirements continues to be under review by the Ministry of the Environment, Conservation and Parks, and consultation with Grand River Conservation Authority is also underway due to the dump being located on GRCA lands. We have been advised that a response to our request is forthcoming.
