

GRAND VALLEY

Town of Grand Valley Operating Budget 2025

Dust Control

The Town purchases calcium to apply to gravel roads to reduce dust during dry seasons, and the budget includes the cost of that calcium supply plus the labour and equipment costs to apply the calcium.

In 2025, the budget request has remained the same. Less calcium was required in 2024 due to wet weather, but if 2025 is a drier year, extra calcium applications may be required.

Second Draft
