

GRAND VALLEY

## Town of Grand Valley Operating Budget 2025

### Safety Devices and Signage

#### 2024 Projects

- Routine sign replacement costs
- Replacement of signage at bridges where identified in the OSIM report
- Speed hump installation for traffic calming on Leeson Street

#### 2025 Projects

- Council has asked for speed humps to be purchased and installed on Taylor Drive
- Depending on the results of public survey, the Leeson Street speed humps may also be reinstalled
- In addition to routine sign replacements, the Town's digital speed signs are aging. One of them no longer functions. The other is malfunctioning and struggles to connect to its software. Funds to purchase one replacement sign are included in the signage budget. If this purchase is left in the budget, staff will seek quotes/proposals for the best type to purchase for our situation.

#### Second Draft:

- No changes

#### Final Draft

- Moved \$20,000 from proposed \$50,000 budget for cancellation of Taylor Drive speed hump project, per resolution 2025-02-52
