Subject: Grand Watershed - Report on Actions 2019-2025

Hello Grand Water Managers,

The final Summary of Accomplishments (2019-2025) in implementation of the Grand River Water Management Plan is now available online: [Grand River Water Management Action Plan 2019 to 2025 Summary of Accomplishments](#)

Thank you for your support in reviewing your organizations' commitments under the plan and in advancing our shared goals for ensuring sustainable supplies, improving water quality, reducing flood damage potential, and enhancing climate resilience. Closing this plan-do-review cycle is an important element of our adaptive planning approach and will set us up well for exploring updated strategies and actions over the coming 2 years.

Best regards,

Jan

Janet Ivey (she/her/hers), B.Sc. MA PMP
